Creating the EC2 Ubuntu Instance

Key pair (login) Info

You can use a key pair to securely connect to your instance. Ensure that you have access to the selected key pair before you launch the instance.

Key pair name - *required*

windows-lab-key

Create new key pair

Network settings Info

Edit

Network | Info

Subnet | Info

No preference (Default subnet in any availability zone)

Auto-assign public IP | Info

Enable

Firewall (security groups) | Info

A security group is a set of firewall rules that control the traffic for your instance. Add rules to allow specific traffic to reach your instance.

- (•) Create security group
- ( ) Select existing security group

We'll create a new security group called '**launch-wizard-5**' with the following rules:

Enable

Firewall (security groups) | Info

A security group is a set of firewall rules that control the traffic for your instance. Add rules to allow specific traffic to reach your instance.

- (•) Create security group
- ( ) Select existing security group

We'll create a new security group called '**launch-wizard-5**' with the following rules:

- [x] Allow SSH traffic from
  Helps you connect to your instance
  Anywhere
  0.0.0.0/0
- [x] Allow HTTPS traffic from the internet
  To set up an endpoint, for example when creating a web server
- [x] Allow HTTP traffic from the internet
  To set up an endpoint, for example when creating a web server

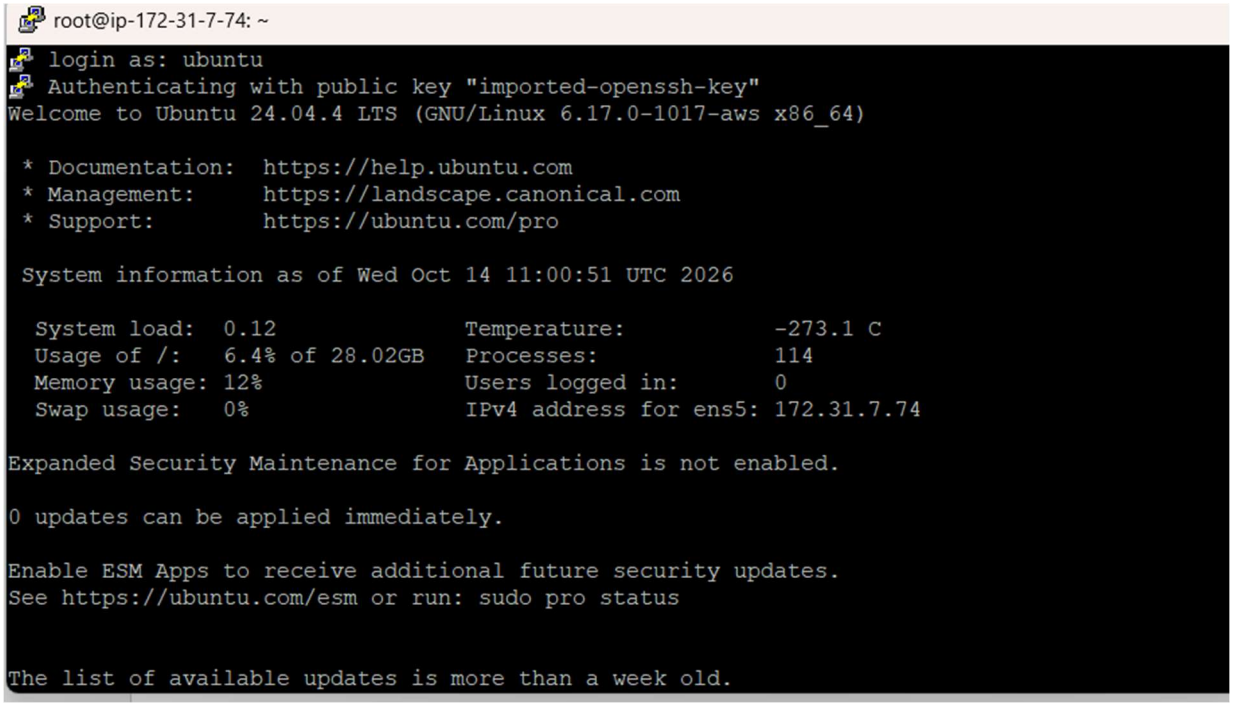

⚠ Rules with source of 0.0.0.0/0 allow all IP addresses to access your instance. We recommend setting security group rules to allow access from known IP addresses only. ✕

mysql> exit
```

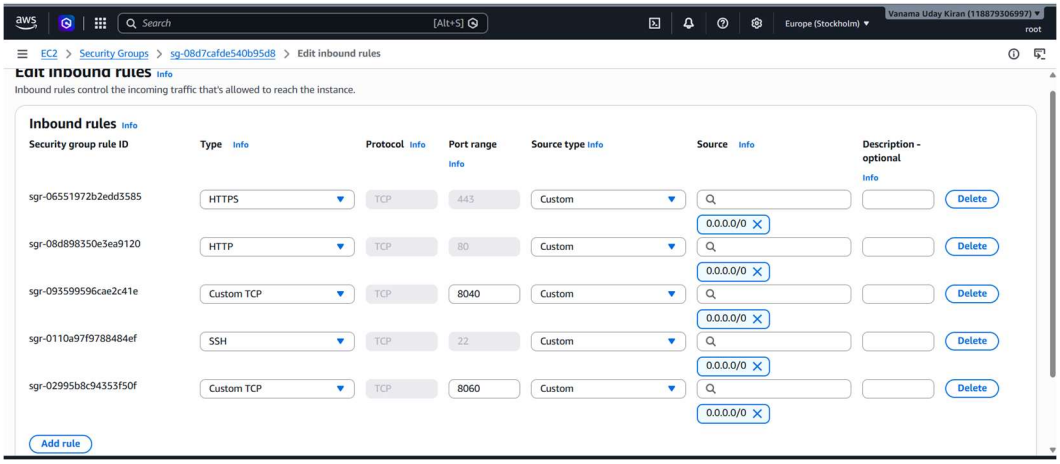

To display The My Sql Using the Ui we use the phpmyAdmin Container and Then connect it

Steps :

Creating and Running the phpmyAdmin container in the 8040 port :

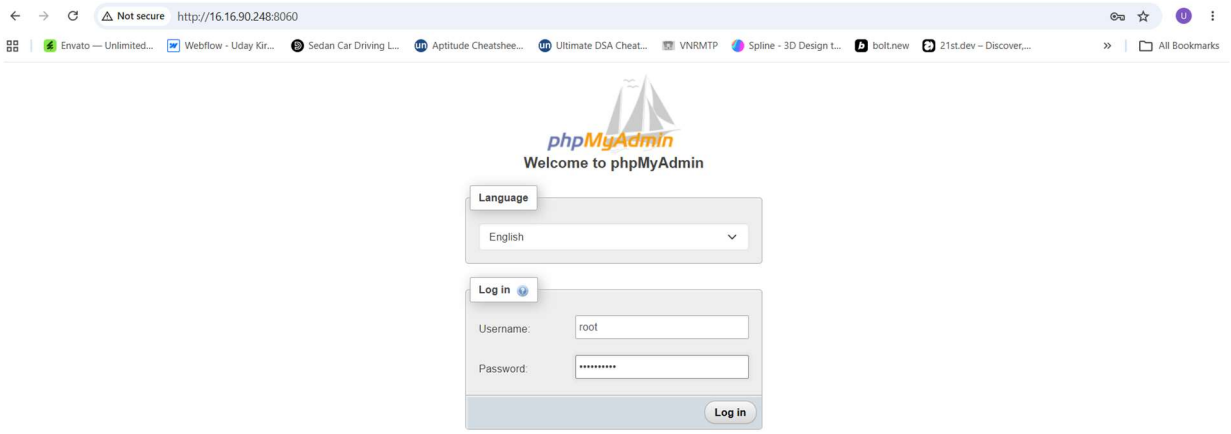

```
root@ip-172-31-7-74:~# docker run -d \
  --name my-phpmyadmin \
  --link mysql-db:db \
  -p 8060:80 \
  phpmyadmin/phpmyadmin:latest
56535594097c21b82574656cc7591730b9012844f4c7ca9ba7bc1f5aa5e4e66d
```

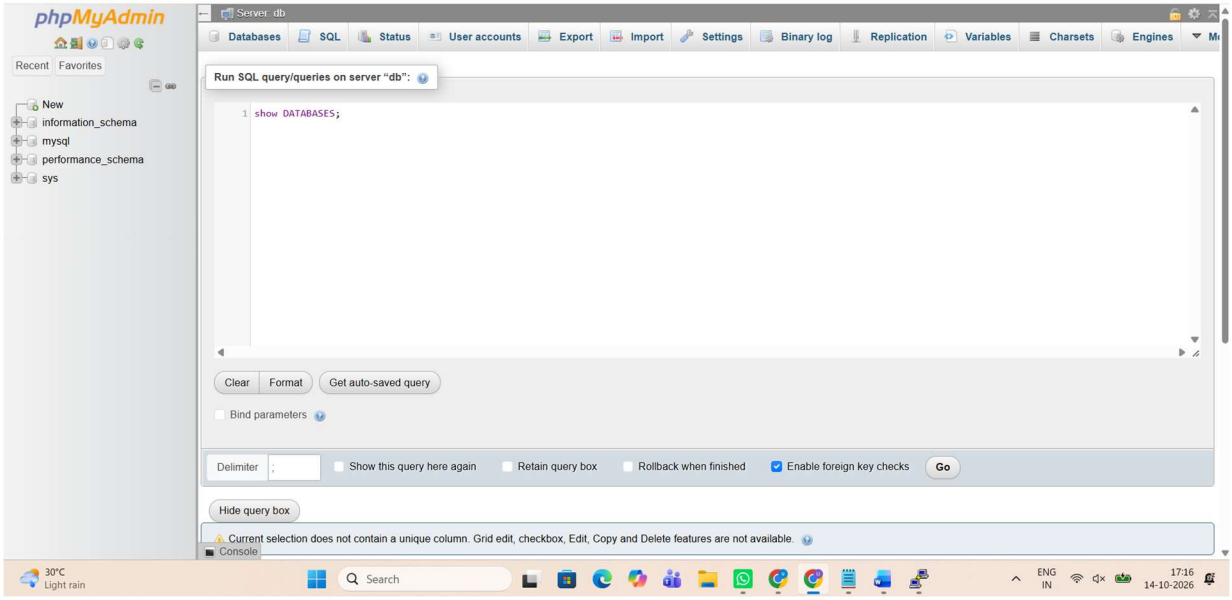

Add the Port 8040 in the Inbound Rules:

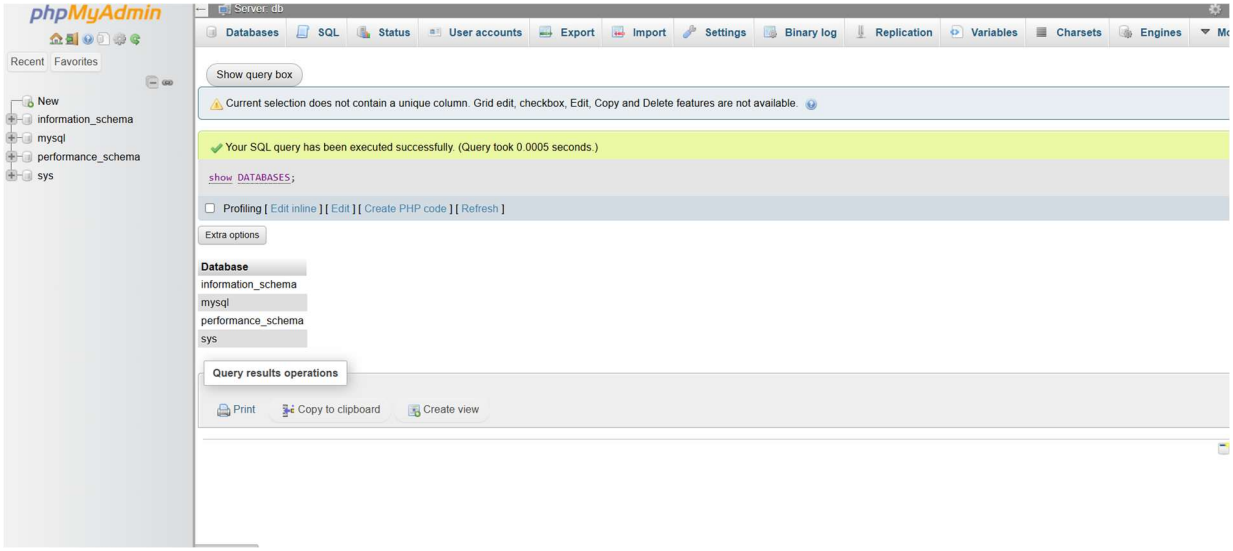

Access the phpmyAdmin in browser :

Enter the credentials:
