1. du -sh /var/log

Checks the total disk space used by the /var/log directory.

Useful when application or system logs consume too much disk space.

```
root@Uday:~# du -sh /var/log
331M    /var/log
root@Uday:~#
```

2. df -ih

Displays inode usage for mounted filesystems.

```
root@Uday:~# df -ih
Filesystem     Inodes IUsed IFree IUse% Mounted on
none             974K     5  974K    1% /usr/lib/modules/6.6.87.2-microsoft-standard-WSL2
none             974K     2  974K    1% /mnt/wsl
drivers           999 -976K  977K     - /usr/lib/wsl/drivers
/dev/sdd           64M  191K   64M    1% /
none             974K    34  974K    1% /mnt/wslg
none             974K     5  974K    1% /usr/lib/wsl/lib
rootfs           972K    12  972K    1% /init

tmpfs            195K    43  195K    1% /run/user/1000
tmpfs            195K    44  195K    1% /run/user/0
```

3. vmstat 1 5

Displays memory, CPU, processes and system activity every second, five times.

```
root@Uday:~# vmstat 1 5
procs -----------memory---------- ---swap-- -----io---- -system-- -------cpu-------
 r  b   swpd   free   buff  cache   si   so    bi    bo   in   cs us sy id wa st gu

 0  0      0 6284320  56776 693468    0    0     0     0  149  233  0  0 100  0  0  0
 0  0      0 6284320  56776 693468    0    0     0     0  114  185  0  0 100  0  0  0
root@Uday:~#
```

sudo lsof +L1

4. lsof +L1

Finds open files that have been deleted but are still held open by processes.

```
root@Uday:~# sudo lsof +L1
root@Uday:~#
```

5. ss -s

Shows a summary of network socket connections.

```
root@Uday:~# ss -s
Total: 223
TCP:   5 (estab 0, closed 0, orphaned 0, timewait 0)

Transport Total     IP        IPv6
RAW       0         0         0
UDP       5         4         1
TCP       5         4         1
INET      10        8         2
FRAG      0         0         0
```

6. systemctl --failed

Lists services that have entered a failed state.

```
root@Uday:~# systemctl --failed
  UNIT LOAD ACTIVE SUB DESCRIPTION

0 loaded units listed.
root@Uday:~#
```

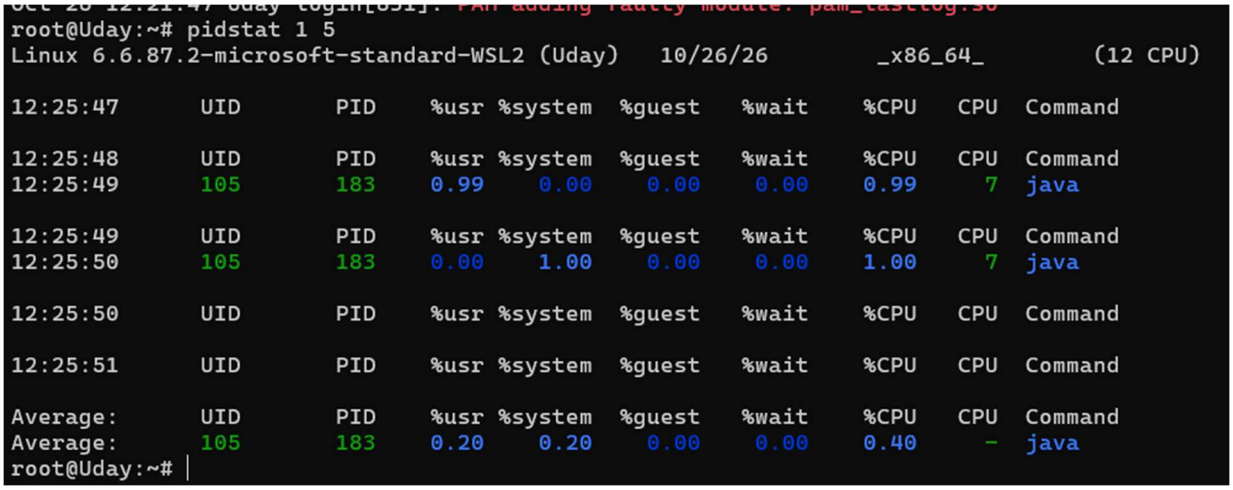

7. fuser -v 8080/tcp

Identifies processes using port 8080, commonly used by Jenkins or test web servers.

```
root@Uday:~# sudo fuser -v 8080/tcp
                     USER        PID ACCESS COMMAND
8080/tcp:            jenkins     183 F.... java
root@Uday:~#
```

8. pidstat 1 5

Reports CPU and other resource usage by individual processes.

9. find /var/log -type f -mtime -1

Finds regular files in /var/log modified within the last 24 hours.

10. nstat -az

Displays Linux network statistics, including TCP and IP counters.
