Loading the orders.csv

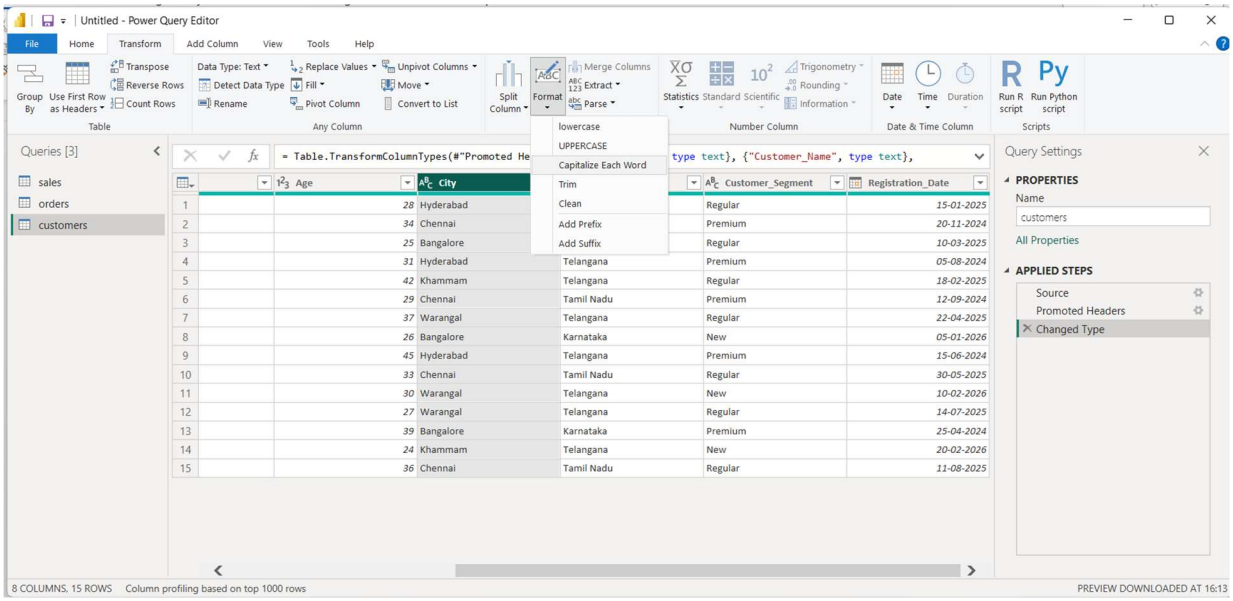

Loading the Customers :

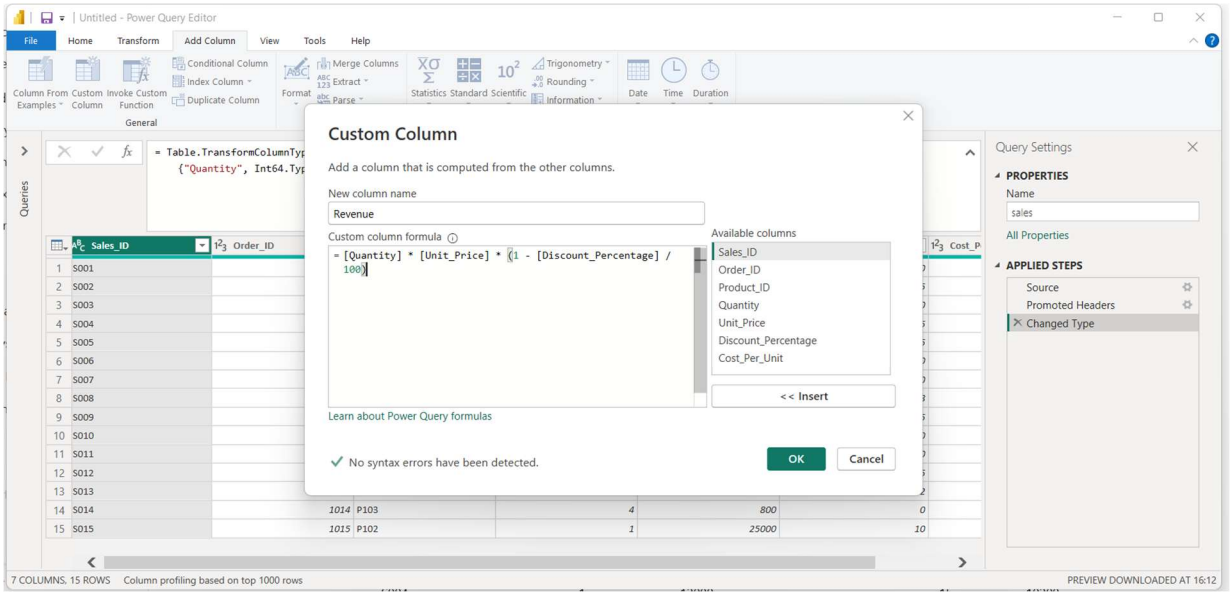

Checking the Datatype :

Capitalizing the City names using the Format :

Adding the column Revenue After the Discount Application :

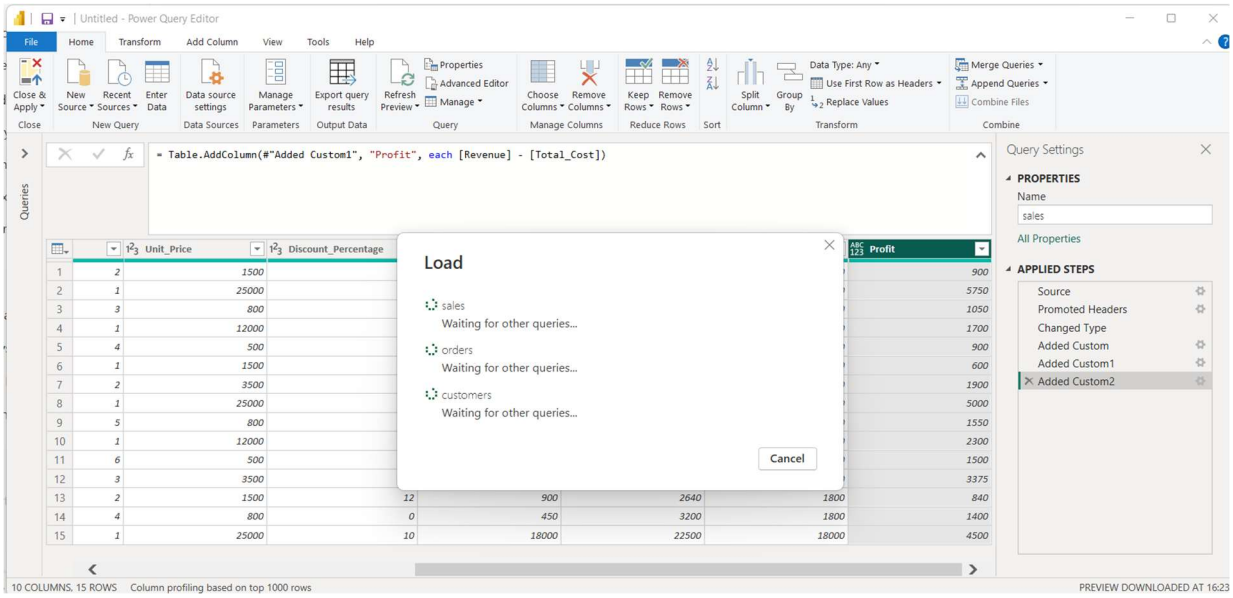

New Column Added :

Quantity	Unit_Price	Discount_Percentage	Cost_Per_Unit	Revenue
2	1500	10	900	2700
1	25000	5	18000	23750
3	800	0	450	2400
1	12000	15	8500	10200
4	500	5	250	1900
1	1500	0	900	1500
2	3500	10	2200	6300
1	25000	8	18000	23000
5	800	5	450	3800
1	12000	10	8500	10800
6	500	0	250	3000
3	3500	5	2200	9975
2	1500	12	900	2640
4	800	0	450	3200
1	25000	10	18000	22500

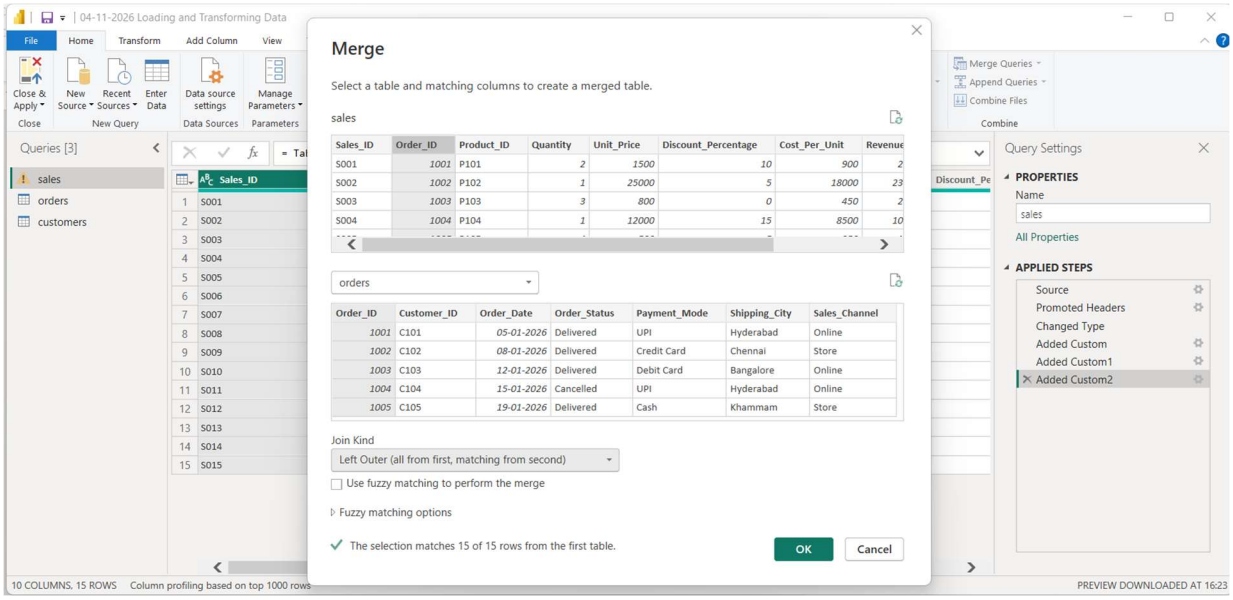

Adding the Total Cost and Profit Column :

	Revenue	Total_Cost	Profit
00	2700	1800	900
00	23750	18000	5750
50	2400	1350	1050
00	10200	8500	1700
50	1900	1000	900
00	1500	900	600
00	6300	4400	1900
00	23000	18000	5000
50	3800	2250	1550
00	10800	8500	2300
50	3000	1500	1500
00	9975	6600	3375
00	2640	1800	840
50	3200	1800	1400
00	22500	18000	4500

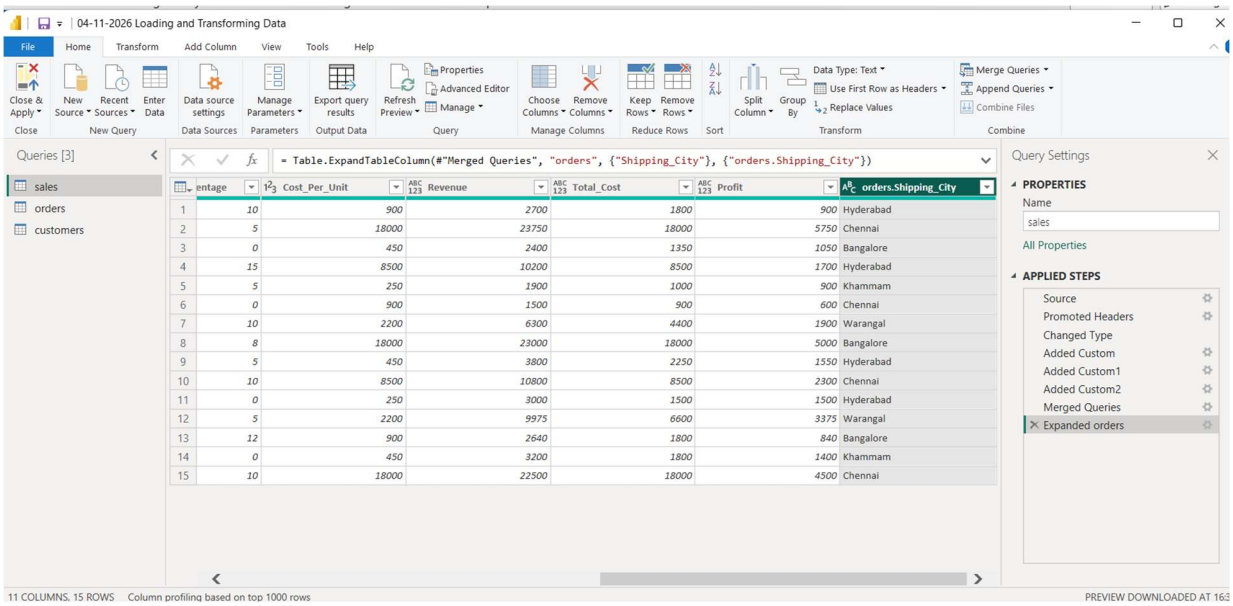

Loading the data after the transformations :
